

DATY.AI COMMUNITY GUIDELINES & ACCEPTABLE USE POLICY

Safety • Respect • Authenticity • Privacy • Responsible Relationship Intelligence
Version 1.0

Effective date: 11 September 2026

OUR STANDARD

Daty.ai is built to help people make better-informed relationship decisions. It must never become a tool for harassment, surveillance, exploitation, deception or coercion. Use Relationship Intelligence to understand more — not to control another person.

ZERO-TOLERANCE AREAS

Sexual exploitation of minors, credible threats of violence, non-consensual intimate content, trafficking/exploitation, serious stalking, deliberate fraud and attempts to use Daty.ai to facilitate serious unlawful harm may result in immediate account action and, where legally required or appropriate, preservation/reporting to competent authorities.

The simple rules

- Be a real person. Do not impersonate, deceive or create fake identities.
- Respect privacy, consent and boundaries.
- Do not harass, threaten, stalk, shame or exploit anyone.
- Never sexualise, groom or exploit minors.
- Do not use Daty.ai or AI Advisor to facilitate abuse, coercion, fraud or unlawful conduct.
- Do not scrape, hack, automate, manipulate referrals or game the platform.
- Do not spam or turn consumer accounts into unsolicited sales channels.
- Do not treat Relationship Intelligence outputs as permission to override another person's words, boundaries or consent.
- Report serious misuse. Do not retaliate against someone for reporting.

1. Scope

This Policy applies to Daty.ai consumer accounts, profiles, AI Advisor, Relationship Intelligence features, compatibility/timing tools, referrals, invitations, community functionality, events, Pioneer-related consumer interactions and other features that reference these Guidelines.

It supplements the Daty.ai Terms of Service. Special rules may also apply to Pioneer Program participants, Pioneer Hubs, events, business accounts or specific campaigns.

2. Respect, Harassment and Bullying

You may not use Daty.ai to harass, intimidate, threaten, humiliate, repeatedly target or deliberately distress another person.

Prohibited conduct includes repeated unwanted contact, threats, coordinated harassment, doxxing, publishing private information to shame someone, encouraging others to target a person, degrading sexualised abuse, or using Daty.ai outputs as ammunition to attack someone.

Disagreement, rejection or an unfavourable compatibility result never justifies abuse.

3. Stalking, Surveillance and Coercive Use

Daty.ai must not be used to stalk, secretly monitor, track, investigate or control another person.

You may not use compatibility, timing, AI, location, referral or other Daty.ai features to evade a person's boundaries, pressure them into contact, infer where they will be, or rationalise continued pursuit after they have said no.

A Daty.ai output is not evidence that another person secretly wants contact or that their expressed refusal should be ignored.

4. Impersonation, Fake Profiles and Authenticity

Do not impersonate another person, organisation, public figure, Daty.ai employee, Pioneer, Hub or partner. Do not create fake profiles, misleading personas or accounts designed to deceive users about who is behind them.

Parody or clearly fictional use is permitted only where the relevant feature allows it and no reasonable person would be deceived.

You may not sell, rent, transfer or operate accounts on behalf of undisclosed third parties.

5. Fraud, Scams and Deceptive Conduct

Do not use Daty.ai to facilitate romance scams, investment scams, phishing, identity theft, payment fraud, fraudulent fundraising, fake opportunities or other deceptive schemes.

Do not request passwords, authentication codes, complete payment-card details or other credentials through Daty.ai.

Users must not misrepresent Daty.ai outputs as verified background checks, psychological assessments, proof of another person's character or official certification.

6. Scraping, Automation and Technical Abuse

Unless expressly authorised in writing, you may not scrape, crawl, harvest, systematically extract, mirror or bulk-download Daty.ai profiles, reports, outputs, databases or user information.

Do not use bots, scripts, automated accounts or unauthorised APIs to create accounts, send invitations, generate artificial activity, harvest information, manipulate metrics or bypass product limits.

Do not probe or exploit vulnerabilities, bypass access controls, reverse engineer protected systems except where a non-waivable legal right applies, introduce malware, interfere with service availability or attempt unauthorised access.

7. Abusive or Unsafe Use of AI Advisor

AI Advisor is designed to help interpret Daty.ai Relationship Intelligence and answer appropriate user questions. It must not be used to plan or facilitate harassment, stalking, coercion, exploitation, fraud, violence or other unlawful harm.

Do not intentionally feed AI Advisor private or sensitive information about another person that is unnecessary for a supported feature.

Do not use AI-generated text to impersonate a real person, fabricate evidence, manipulate someone emotionally, create deceptive communications, or falsely represent an AI-generated statement as professional advice or a verified fact.

Users remain responsible for how they use AI-generated content.

8. Unlawful and Harmful Content

You may not upload, request, distribute or use Daty.ai to facilitate content or conduct that is unlawful in the applicable context.

This includes credible threats, instructions intended to facilitate serious wrongdoing, unlawful privacy violations, extortion, blackmail, trafficking, exploitation, malicious software or other content Daty.ai is legally required to restrict.

Daty.ai may preserve or disclose relevant information where required by law or where permitted by applicable law and necessary to address a serious safety, fraud or security risk, as further described in the Privacy Policy.

9. Sexual Exploitation and Non-Consensual Sexual Content

Daty.ai prohibits sexual exploitation, sexual coercion, trafficking, non-consensual intimate imagery, threats to distribute intimate content, sexual blackmail and content that depicts or facilitates sexual violence or exploitation.

Do not share another person's intimate or sexual information without appropriate permission. Do not use Relationship Intelligence or AI to pressure someone into sexual activity or to rationalise disregard for consent.

Consent must be freely given and can be withdrawn. Compatibility does not equal consent.

10. Minors

Daty.ai is intended exclusively for individuals aged 18 or older. You may not create or use an account if you are under 18 or provide false age information to bypass our age controls.

Any sexual content involving minors, sexual grooming of minors, solicitation of sexual material from minors, or sexual exploitation of minors is prohibited.

Daty.ai may immediately restrict or suspend an account where we reasonably suspect child sexual exploitation or another serious child-safety risk. We may preserve relevant information and report the matter to competent authorities where required or permitted by applicable law.

11. Discriminatory Abuse and Hateful Conduct

Daty.ai does not permit attacks, dehumanising abuse, threats, exclusionary harassment or encouragement of harm directed at people because of protected characteristics such as race, ethnicity, nationality, religion or belief, disability, sex, gender, gender identity or expression, sexual orientation, age or other characteristics protected by applicable law.

Users may discuss preferences, identity, culture and relationship experiences, but may not use Daty.ai outputs to present discriminatory stereotypes as objective truths about individuals or groups.

AI or compatibility outputs must not be used to justify discriminatory high-impact decisions about another person.

12. Spam and Unwanted Contact

Do not send bulk, repetitive or unsolicited messages, invitations or referral links. Do not use purchased lists, harvested contacts or automated outreach.

Referral functionality is for genuine invitations and community growth, not spam. A recipient's request not to be contacted must be respected.

Manipulating unsubscribe controls or repeatedly contacting someone through different accounts after they opt out is prohibited.

13. Commercial Solicitation

Consumer Daty.ai accounts are not general-purpose sales channels. Unless a feature or separate programme expressly permits it, do not use Daty.ai to mass-market products, recruit into unrelated schemes, solicit investments, sell financial products, promote gambling, or conduct unauthorised commercial prospecting.

Approved Pioneer, Hub, referral or partner activities must follow their specific programme terms and approved materials. Participation in such a programme does not make a user an employee, agent or unrestricted representative of Daty.ai.

14. Account, Referral and Platform Manipulation

Do not create duplicate/fake accounts to obtain rewards, manipulate waiting-list numbers, referral tiers, leaderboards, engagement, city metrics, event attendance or promotional eligibility.

Do not buy, sell or exchange referral sign-ups, fabricate conversions, use click farms, automate QR/link traffic or collude to create artificial activity.

Daty.ai may invalidate manipulated activity and reverse associated benefits, subject to applicable law.

15. Misuse of Relationship Intelligence

Relationship Intelligence is designed for understanding and reflection. It must not be used as a weapon.

- Do not present a Daty.ai interpretation as a verified fact about another person.
- Do not use a score to publicly shame or rank identifiable people.
- Do not claim Daty.ai proves that someone is dishonest, unfaithful, abusive, attracted to you or destined to be with you.
- Do not use timing signals to justify unwanted contact or risky behaviour.
- Do not publish another person's private report or inputs without permission.
- Do not use Daty.ai as a substitute for consent, direct communication or professional risk assessment.

16. Privacy and Third-Person Information

Only provide information about another person where you are permitted to do so and where the Daty.ai feature legitimately requires it.

Do not create dossiers, upload leaked/private communications, enter unnecessary sensitive allegations, scrape another person's data, or use Daty.ai to infer highly sensitive characteristics for harmful purposes.

Third-person information remains subject to the Daty.ai Privacy Policy and product-level restrictions.

17. Intellectual Property and Content Misuse

Do not copy, reproduce, sell, redistribute or commercially exploit Daty.ai proprietary reports, software, databases, designs, methodologies or protected content except as permitted by the Terms of Service.

Do not remove Daty.ai branding from protected reports to falsely present them as your own product, and do not use Daty.ai content to build a competing service without permission except where applicable law grants a non-waivable right.

18. Reporting Misuse

If you encounter content, behaviour or an account that you believe violates these Guidelines, use the in-product Report function where available or contact safety@daty.ai.

For urgent danger, users should contact appropriate local emergency services. Daty.ai is not an emergency-response service.

Reports should include enough context to understand the concern. Do not submit knowingly false reports to harass another user.

19. What Happens After a Report

Daty.ai may use automated systems and/or trained human review to assess reports, account history, relevant content and technical evidence, subject to privacy and access controls.

Depending on severity, context and confidence, Daty.ai may take no action, issue a warning, remove/restrict content, limit features, invalidate referral activity, require verification, temporarily suspend an account or permanently terminate access.

Serious safety, fraud, security or legal matters may be escalated internally and handled in accordance with applicable law.

20. Enforcement Principles

Daty.ai enforce these Guidelines proportionately and consistently. Relevant factors can include severity, intent, actual or potential harm, repetition, prior violations, vulnerability of affected persons, attempts to evade enforcement and reliability of available evidence.

Not every mistake requires permanent termination. However, serious conduct may justify immediate action without prior warning.

Daty.ai may use feature-specific restrictions where that is sufficient to address the risk.

Illustrative level	Examples	Possible action
Level 1 – Low / first misuse	Minor spam, inappropriate solicitation, non-malicious policy misunderstanding	Education, warning, content removal
Level 2 – Repeated / material	Repeated harassment, fake account, referral manipulation, privacy misuse	Feature restriction, verification, temporary suspension, benefit reversal
Level 3 – Severe	Credible threats, serious stalking, fraud, sexual coercion, deliberate exploitation	Immediate suspension/termination, preservation/escalation
Level 4 – Critical child/safety risk	Child sexual exploitation, trafficking, imminent serious harm	Immediate protective action and legally required/appropriate reporting

21. Evasion and Repeat Offenders

Do not create new accounts, use another person's account, change identifiers or use technical measures to evade a restriction or termination.

Daty.ai may take reasonable steps to identify and restrict repeat abusive actors, consistent with applicable privacy and consumer law.

22. Appeals

Where appropriate and required by applicable law, users should have a reasonable way to challenge a material enforcement decision.

Appeals are reviewed impartially and are not decided solely by the same automated process that produced the original decision. Where appropriate, the review includes meaningful human consideration.

An appeal does not automatically restore access while a serious safety investigation is pending.

23. Protection Against Retaliation

Do not threaten, harass, expose or punish another person because they reported conduct, blocked contact, refused an invitation or cooperated with a Daty.ai safety review.

Retaliation can itself result in enforcement.

24. Changes to These Guidelines

Daty.ai may update these Guidelines as features, risks, law and community needs evolve. Material changes will be communicated where appropriate. The current version and its effective date will remain accessible through the Service or website.²⁵ Contact
